Indian Institute of Technology Delhi

Indian Institute of Technology Delhi, where ISME 2015 will be organized, is one of the premier institutions in India created as centers of excellence for training, research and development in science, engineering and technology in India. HRH Prince Philip, the Duke of Edinburgh, laid the foundation stone of the Institute on January 27, 1959. Established as College of Engineering in 1961, the institute was later declared as an Institution of National Importance and renamed "Indian Institute of Technology Delhi" in 1963. The Institute has made a notable mark in higher technical education and research. It has been ranked very high among national and international institutions of higher learning. The Institute celebrated its Golden Jubilee Year during 2010-2011.

IIT Delhi is situated at Hauz Khas in South Delhi, which is a landmark place in the colourful and chequered history of Delhi. The Institute campus with an area of 320 acres is flanked by the famous Qutub Minar and the Hauz Khas historic monuments. With many topographical features, imaginatively laid out with picturesque landscape, numerous buildings of various nature and stature, and clean and wide roads, the campus presents a spectacle of harmony in architecture and natural beauty. Well connected to the major city centers by open and wide roads, the Institute campus is about 19 km away from the Delhi Main Railway Station, 14 km from the New Delhi Railway Station, 21 km from the Inter-State Bus Terminal and 10 km from Terminal 1 of Delhi Airport.

17th ISME Conference
On Advances in Mechanical Engineering
Indian Institute of Technology Delhi

October 3 - 4, 2015

Indian Institute of Technology Delhi
Hauz Khas, New Delhi -110016, INDIA
The Indian Society of Mechanical Engineers (ISME) is organizing a conference on “Advances in Mechanical Engineering” from 3rd to 4th October, 2015 at Indian Institute of Technology Delhi. In the new millennium, research in mechanical engineering has progressed towards emerging areas such as processing of advanced materials, micro/nano manufacturing, microfluidics, energy harvesting and utilization, biomechanics, medical robotics and precision mechatronics. The purpose of this conference will be to bring together the mechanical engineering community to explore, disseminate and strengthen initiatives in such new directions under the broad areas of manufacturing, thermofluids and mechanical design.

CALL For Papers/Posters
The conference will be divided into following tracks from Mechanical Engineering:

- Track 1: Mechanical Design
- Track 2: Manufacturing Sciences
- Track 3: Thermofluids

Who Should Attend
- Delegates from industry
- Academicians
- PhD. Scholars, and Students (PG & UG)
